## **POLISHING COMPOUND**

### **HAND**

1. Apply to small areas, about one to two square feet.
2. Dispense a quarter-size drop of material onto a clean, soft, cotton terry cloth towel and apply to the paint surface.
3. Work the area using a firm, circular motion until the rubbing compound is dry.
4. Remove remaining film using a clean, soft, cotton terry cloth towel.

### **MACHINE**

1. Dispense enough compound on the paint surface to work a two-foot by two-foot area.
2. Buff area using an air or electric buffer using light to medium pressure.
3. Reduce pressure when compound begins to dry.
4. Remove remaining film using clean, soft, cotton terry cloth towel.
